

BIG SANDY NEWS.

Aut inveniam viam, aut faciam.

LOUISA, LAWRENCE COUNTY, KENTUCKY, MARCH 10, 1905.

M. F. CONLEY, Publisher.

VOL. XX NO 27.

THE NEWS OF THE WEEK.

A Daily Resume of Important Happenings.

March 2.

The State Capitol Commission met at Frankfort. Architect Andrews said that work of erecting the Capitol will begin by June 1.

In the Chadwick bankruptcy proceedings at Cincinnati, W. V. Coons, a broker, testified that he received from Mrs. Chadwick a bonus of \$12,500 on an approximate loan of \$75,000.

The Government received a majority of only twenty-four on an amendment in the House of Commons last night. It was greeted with great cheering by the opposition and by cries of "Rodriguez."

After passing general and legislative appropriation bills, for which purpose Gov. White convened the West Virginia Legislature in extraordinary session last Saturday, both houses yesterday adjourned sine die.

Secretary of State Hay has written the Haydon Minister in Washington a letter assuring him that the United States harbors no purpose to annex or under any pretext to possess themselves of either Hayti or Santo Domingo.

The Cuban-Spanish Control Committee of the Colorado Legislature yesterday decided in favor of Penobscot. Only thirteen of the eighteen Republicans on the committee would sign the report, however, while all nine Democrats signed the minority report in favor of Adams.

Attorney General Moody has sent out a circular letter to all United States District Attorneys urging them to make diligent inquiry for any evidence of violations of the law by the Beef Trust and report the same to United States Attorney Belmont at Chicago by March 15.

An advertisement for fifty snow-shovelers for a city work nearly precipitated a riot in New York. Three hundred men gathered in response to the advertisement and fought each other for the opportunity to get the work checks. The police had to be called out to quell the crowd.

The plague has broken out in Bagdad, India, a city of 70,000 inhabitants. Every quarter of the city is said to be infected, and the Government has practically abandoned efforts at quarantine. Some districts are said to be prevailing among the poorer people in many sections of India.

The Stone Lake Ice Company, of Cincinnati, entered a plea of guilty to the Covington Circuit Court of farming a trust to regulate the price of ice. A fine of \$500 was assessed. The company was indicted two years ago along with a score of other companies. All the other indictments were dismissed.

The strike troubles are being renewed in all the important industrial centers in Russia. At St. Petersburg 50,000 men are out, and threats of a general strike are made unless the demands of the workmen's representatives are granted by the Government. The trouble at Moscow has been renewed on a large scale. There is anarchy in the Caucasus and serious outbreaks are reported from Warsaw and elsewhere.

The death of Mrs. Leland Stanford, according to one of the physicians who performed the autopsy, was due to strychnine poisoning. The acting chief of police of San Francisco received a cablegram from the High Sheriff of Honolulu saying that the bottle of bicarbonate of soda from which Mrs. Stanford took a dose just before her death contained 662 grains of strychnine, enough to kill 662 people.

The ice gorge bore down upon the Cincinnati harbor and did damage estimated at half a million dollars. Boats tied to the bank were jammed to pieces and loaded barges were sunk. It is stated that every boat in the river, with the exception of those that sought shelter in the Licking river, is in danger of destruction. The steamer New South, which was carried by the gorge down the Ohio, landed near Madison, Ind.

Mrs. Leland Stanford, widow of former Senator Stanford, of California, died suddenly in Honolulu of strychnine poisoning. She was seized with the fatal attack in the night, and the physician who first arrived at the bedside stated that she exclaimed that she had been poisoned. A friend of Mrs. Stanford says the latter told her that an attempt on her life had been made in San Francisco, and that she had left that city to avoid a reputation of it.

March 4.

Gov. Handy announced that he would appoint to office only total abstainers.

Judge Charles B. Brown, of Fleming county, to-day became Assistant State Auditor, succeeding W. J. Day, of Louisville, who assumes other duties under the Auditor.

As the result of an alleged refusal to issue a recommendation Bayless Shannon, local freight agent of the Union railroad, was shot yesterday morning by R. Frank Keith. He will survive.

The City Club of Louisville, an organization which will endeavor to carry the fall election, was organized last evening at a meeting at the Old House of about 250 citizens. John H. Brand was elected president.

President Roosevelt will be the guest of the city of Louisville on March 28, arriving here at 9 o'clock in the morning and probably remaining all day. Extensive preparations for entertaining him will be made.

The crowd in Washington is said to be much smaller in numbers and enthusiasm than that which gathered for Cleveland's first inauguration. The South is to be well represented in to-day's exercises and a number of Southern regiments will march in the parade. The attendance from Kentucky is small.

The Emperor of Russia has issued a rescript to the Minister of the Interior, stating that he has decided to convene an assembly of elected representatives of the people to elaborate and consider legislative measures. The Emperor has also issued a manifesto to the people of Russia, calling for co-operation in the war against the "stubborn foreign foe."

Thirty persons were killed and twenty others injured in a rear-end collision between two Washington special trains on the Cleveland and Pittsburgh railroad, near Pittsburgh, last night. The first train had stopped to cool a hot box, and the second was following so closely that a flagman could not get back in time to give the warning before it dashed into the rear end of the train ahead.

Officers from Breathitt county went to Winchester by order of court to secure Mose Feltner and Sam Fields, who are wanted in Breathitt, the former on the charge of murder and the latter as a witness in the case. They are in jail at Winchester, in default of bail, to answer at the April term of the Clark Circuit Court under charges of contempt. The question of jurisdiction comes up to-day before Judge Benton, of Winchester.

A report made by a San Francisco chemist, of his analysis of the mineral water used by Mrs. Stanford, and in which it was supposed poison had been placed, was made public yesterday. It shows that about eight-tenths of a grain of strychnine was found in a water-glass of the fluid. Mrs. Stanford drank of this water before her departure for Honolulu. It is said the bottle of bicarbonate of soda from which Mrs. Stanford took the fatal dose was filled at a drug store at Palo Alto, her home. It is expected that two persons will be arrested as soon as the report of the chemist who are examining the contents of the dead woman's stomach is made.

The President yesterday transmitted to Congress the report of the Commissioner of Corporations on the Beef Trust inquiry. The report is rather in the nature of a statement of the business of the various concerns supposed to make up the trust than an exposure of workings of a monopoly. In fact, the report says that the six principal concerns engaged in the business slaughtered only about 45 per cent of the cattle sent to market in 1903, and that the profits of these concerns at any time covered by the investigation have been small. Competition also is reported to be active. The private car lines, however, are shown to have been big money makers.

March 5.

Johann Hoeh, the multiple bigamist, has been indicted in Chicago for the murder of his last wife but one, Mrs. Marie Wilcker Hoeh.

Indictments growing out of the two quota theater fire in Chicago were returned against Will J. Davis, former resident manager of the theater; William Laughlin, Deputy Building Inspector of Chicago; and George Williams, City Building Inspector. Davis was indicted for involuntary manslaughter and Laughlin and Williams for neglect of duty.

The investigation of the Beef Trust by the Federal grand jury at Chicago will proceed regardless of the report made by the Department of Commerce and Labor. Assistant United States District Attorney Morrison, of Chicago, said yesterday that the department's men were not sent out to find violations of the Sherman act, and their investigations will have nothing to do with the grand jury's work.

Messrs. Gaynor and Greene, who are wanted by the Federal authorities in Georgia for subornation of money in connection with river improvement contracts, were arrested yesterday and will be held to answer extradition proceedings. This step is in pursuance of the judgment of the English Privy Council to the effect that they were expressly discharged on habeas corpus, by a Canadian court, on the occasion of their previous arrest.

The time in the final sitting of the House yesterday was largely taken up with expressions of good will and kind fellowship. Loving cups were presented to Speaker Cannon and Minority Leader Williams. Both responded in happy speeches. Mr. Han-

A Matter of Health

There is a quality in Royal Baking Powder which makes the food more digestible and wholesome. This peculiarity of Royal has been noted by physicians, and they accordingly endorse and recommend it.

ROYAL BAKING POWDER CO., NEW YORK.

DO YOU GET UP WITH A LAME BACK?

Kidney Trouble Makes You Miserable.

Almost everybody who reads the newspapers is sure to know of the wonderful cures made by Dr. Klinger's Swamp-Root for the great kidney, liver and bladder remedy. It is the great medical triumph of the nineteenth century, discovered after years of scientific research by Dr. Klinger, the eminent kidney and bladder specialist, and is wonderfully successful in promptly curing lame back, kidney, bladder, uric acid troubles and Bright's Disease, which is the worst form of kidney trouble.

Dr. Klinger's Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble it will be found just the remedy you need. It has been tested in so many ways, in hospital work, in private practice, among the helpless and poor to purchase relief and has proved so successful in every case that a special arrangement has been made by which all readers of this paper who have not already tried it, may have a sample bottle sent free by mail, also a booklet telling more about Swamp-Root and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and the name of Swamp-Root, Dr. Klinger & Co., Inc., 100 N. York St., New York City. The regular fifty cent bottle size is sold by all good druggists.

Does Poultry Pay?

Poultry may be successfully raised on land that is both thin and hilly. The rental for such land is low. If the poultryman has fifty-acre plot of which half is fertile, 25 acres may be devoted to breeding flocks and the balance to feed the flocks.

With a 50-acre farm, one-half devoted to poultry culture and the other to the raising of grain, a man can, with one hired assistant, clear more money in a year than he could had he worked a section of land for all it was worth. He can grow turkeys, chickens, ducks and geese—both for eggs and meat and with our rapidly growing population and the consequent increasing demand, there will never be a time when a young chicken will beg for a place in the market at from 25 to 30 cents. On the contrary, the market will beg for the fowls at prices from 25 to 50 per cent higher.

Poultry is an sure crop as any that may be grown on the farm. True, you may have cholera or some other troublesome disease, and your flock may be greatly reduced, but are not droughts and cyclones likely to play equally as much havoc with growing crops?

To the man who is interested in poultry I say, by all means go into the poultry business. Select a suitable location, so a little show the first year until you acquire a little experience, and then let people know that you are in the business by a judicious use of advertising space. Even if you are raising poultry for purely market use, it will pay to make it known that you are strictly fresh eggs in any quantity, and the finest fowls may always be had. Then bear in mind that cleanliness is the life of poultry and strive to keep your place scrupulously clean. Perseverance and hard work only will be required to crown your efforts with success.—Correspondent Ohio Poultry Journal.

\$100 REWARD, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is an internally acting, directly upon the blood and mucous surfaces of the system, thereby destroying the foundations of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have no much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address P. J. Cheney & Co., Toledo, Ohio. Sold by all druggists, 75 cents. Take Hall's Family Pills for constipation.

Good Roads.

Mr. Editor:—As the subject of "Good Roads" is being discussed through our medium, the SANDY NEWS, we would like to have space in your valuable paper for one more "say." We are not coming in an aristocratic way, wearing a hundred dollar suit neither are we nude, but clad in our working habit with sledge and pick in hand, notifying what we preach. We never have thought that good roads would spring up spontaneously but would come by the dint of hard labor. Neither do we believe that we can sit still on the stool of do-nothing and contentment and keep pace in this progressive age. This is a subject that concerns the humblest citizen in our land. Under our present system the humblest citizen is usually the one that is first to work his six days and says the least while some in higher walks of life are only willing to give their advice (?) as to the communities that are entitled to good roads.

We believe that the leading thoroughfare of this county should be so located that they will accommodate the greatest number possible and outside of this one community has an good right to a good road as another provided they use the same energy. Any thing short of this would be booting on favoritism.

If our memory serves us right a few years ago the "moon-backs" and "cold water pourer" of Boyd county heaped indignities upon the county officials for the steps they took when they began to build good roads. The good work went on and the citizens now under no circumstances would return to the old system. As a result of this land has increased in value, capital has sought investment and Boyd county is one of the leading counties in the State to-day.

We confess frankly that we have actually been away from home and have seen some good roads but with proper energy we are inclined to believe that people will not have to leave home to see good roads. Don't misunderstand us to say that we think that Lawrence county is prepared at this time to build metal or macadam roads or even compete with Boyd county. But we would like to see the citizens become so interested in good roads that the right of way would be granted and the road properly located. We never can have good roads without the proper location. When the roads are properly located and with a good road system and no cold water pourers we may hope for better results than we have ever experienced in the past.

Some people are so afraid of debt that they are opposed to lending the county for funds to build roads. Some of our best business men began business on a borrowed capital. Our State and even our nation at times issue bonds. It depends on the man in whose hands it is placed and the judicious use of same.

We speak in the highest terms of the county officials that are doing what they can to advance the cause of good roads.

There is no question about roads. They are going to be built. The only question is will the people of to-day bend their energies to this and build roads or else out their existence and not enjoy the present as they should?—Vandike.

THE ORIGINAL.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. Ask for FOLEY'S Honey and Tar and refuse any substitute offered as no other preparation will give the same satisfaction. It is mildly laxative. It contains no opiates and is safest for children and delicate persons.

Doing Fairly Well.

Kentucky has not done so badly after all in the way of appropriations to the Rivers and Harbors Bill. Taking the appropriation of \$5,000,000 in the Sugarly Civil Bill in connection with those previously mentioned, the State gets a pretty good allowance. The \$50,000 improvements already authorized are for the Big Sandy which will include the raising of the crest of dam No. 3 at Louisa from twelve to sixteen feet. The contract for construction of locks Nos. 1 on each fork of the river above Louisa was let on the 25th of January. Work will be commenced as soon as spring opens.—Courier Journal.

PLEASANT AND HARMLESS.

Don't drug the stomach to cure a cough. One Minute Cough Cure cuts the mucus, draws the inflammation out of the throat, lungs and bronchial tubes, heals, soothes and cures. A quick cure for Croup and Whooping Cough. Sold by Louisa Drug Co.

Special Clubbing Offer.

An arrangement has been made by the NEWS by which, for a limited time, we can furnish the Cincinnati Weekly Enquirer and this paper one year for \$1.50. Those wanting to take advantage of this offer should do so as soon as possible, as we do not know how long the arrangement will last. The Weekly Courier-Journal will also be furnished at the same price. Also, we will furnish you Daily Cincinnati Post and the Big Sandy News, both one year, for \$2.50.

FOR TWENTY-ONE YEARS

Catarrh Remedies and Doctors Failed—Pe-ru-na Cured.

MR. A. E. KIDD.

ELGIN, ILL.—In a very recent communication from this place comes the news that Mr. Arthur Ernest Kidd, a well-known architect of that city, has made complete recovery from catarrh of the head from which he had suffered for nearly a quarter of a century. He writes from 18 Hamilton ave.:

"I am 42 years of age, and have had catarrh of the head for over half of my life, as a result of scarlet fever, followed by typhoid fever. I got so bad that I was almost constantly coughing and clearing my throat. The catarrh greatly impaired my eyesight, and the hearing in one ear, and reduced my weight to 110 pounds.

"I tried nearly every catarrh remedy advertised, besides a great many different physicians' treatments, all of which failed.

"I had heard and read of Peruna, and finally decided to try it two months ago. I have now taken seven bottles, and weigh 172 pounds. Never felt happier or merrier. Feel top top."—A. E. KIDD.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Nasal CATARRH. In all its stages there should be eliminated. Ely's Cream Balm cleanses, soothes and heals the inflamed membrane. It cures catarrh and drives away a cold in the head quickly.

Ely's Cream Balm is placed into the nostrils, spreads over the membrane and is absorbed. Relief is immediate and a cure follows. It is not drying—does not produce sneezing. Large size, 50 cents at Druggists or by mail. Trial Size, 10 cents by mail. ELY BROTHERS, 21 Warren Street, New York.

DR. ELBERT C. JENKS, DENTIST.

In Bank Block over O'Neal & Carter's Law Office. Permanently located in Louisa.

Alfalfa As A Fertilizer.

I have been in the West for thirty-five years, and a large portion of that time have been employed by both the Government and railroad companies as surveyor, examiner and appraiser of lands, before being employed as an appraiser of lands by a large system like the Union Pacific Land Department with its millions of acres; said appraiser is supposed to have pretty good judgment of quality and value of soil.

In my travels I noticed everywhere that alfalfa had been sowed and plowed up. The crops that followed made a marvelous growth, and for many years I have experimented with alfalfa on all kinds of Western soils. Watched the results of hundreds whom I had advised to experiment, and it is truly wonderful the large crops that can be raised following alfalfa that has been seeded two years or over on any land moist enough to grow the alfalfa. Any land irrigated in Colorado that ordinarily raises twenty to thirty bushels of wheat, put in alfalfa two years, and cut three hay crops per year, and follow it with wheat, will produce fifty to seventy bushels of wheat per acre, oats in proportion, and will make potatoes double and triple when following alfalfa.

In my recent visit to Pennsylvania I inquired of many people through Iowa, Illinois, Indiana, Ohio and Pennsylvania why they did not raise alfalfa. The answer generally was they could not cure it for hay. Providing that is the case, why not raise it for a fertilizer?

While growing it makes the best of pastures for hogs, and after two years' growth the land will be richer and produce larger crops than a dozen crops of red clover would make it. There is not a nickel in my pocket telling this, as I have not a pound of seed to sell, or ever expect to have, but I am telling it for the good of the farmer who puts all or a large portion of his profits into fertilizers. It may take two or more years to prove my assertion about alfalfa as a fertilizer; it took years to find it out in the West, but it is an experiment with us now. I have told thousands of people where they could get choice pieces of land that I came across while surveying and examining lands that I did not get a cent for.

If troubled with weak digestion, belching or sour stomach, use Chamberlain's Stomach and Liver Tablets and you will get quick relief. Sold by A. M. Hughes.

ONLY ONE CHANCE IN A YEAR

To buy fresh, clean up-to-date suits and Overcoats for less in price than the first cost of manufacturing.
